

International Joint Market and Technology Study

ENERGY STORAGE SYSTEMS

KICK-OFF MEETING ON JANUARY 30TH, 2018 | 13:00 – 16:30h

RWTH International Academy | Campus Boulevard 30 | 52074 Aachen, Germany

Background

AZL Aachen GmbH launches an international Joint Market and Technology Study which provides a detailed market insight in technologies and the variety of energy storage systems. The study will be realized in cooperation with RWTH Aachen University and CONBILITY GmbH with a duration of 8 months. The BVES Bundesverband Energiespeicher e.V. (German Energy Storage Association) supports the targets of the study.

Scope of the Kick-Off Meeting

The kick-off meeting will start the first stage of the study that comprises the market segmentation including sizes and growth potentials as well as the definition of use cases, applications and players. A questionnaire will be distributed prior to the meeting to collect the participants input. The agenda of the kick-off meeting will be distributed in January 2018.

Registration

The kick-off meeting is open to all companies participating in the study. The study addresses material supplier, system producer, service provider or end users.

ADDRESSED QUESTIONS

- ▶ What kinds of technologies exist and what readiness level do they have?
- ▶ Which different types of system configurations are used today for each storage technology?
- ▶ What materials are processed?
- ▶ What are the enabling key-technologies?
- ▶ What are the use cases and application criteria?
- ▶ How big are the economic potentials?
- ▶ Who are the key-players and how are the value chains structured?
