

Lightweight TechTalk

DESIGN METHODOLOGY FOR MULTI-MATERIAL LIGHTWEIGHT COMPONENTS

Inspired by the great response to the interactive workgroups, the AZL is launching the new series "Lightweight TechTalk" every 6 weeks, a digital platform for networking and presenting technology and market insights to the international lightweight construction community.

In this TechTalk, three inspiring presentations open up different perspectives on product development and potential assessment of multi-material lightweight components. More information about your networking opportunities can be found on the next page.

Interactive AZL video conference with around 80 participants

May 28th, 2020 | 14:00 – 15:15 (CEST)

- 14:00 Introduction and welcome**
- 14:10 Design with thermoplastic composites from material producer's perspective**
Warden Schijve, Sabic
- 14:25 Modell-based system engineering**
Jonathan Sprehe, Institute for Machine Elements and Systems Engineering of RWTH Aachen University
- 14:40 Design from material producer's perspective**
André Wilmes, Rafinex
- 14:55 Integrative approach to component design and production concepts**
AZL
- 15:15 End**

Warden Schijve, Chief Scientist Composites, Sabic

Jonathan Sprehe, Division Manager Systems Engineering - Process Development, Institute for Machine Elements and Systems Engineering

André Wilmes, CEO, Rafinex
