

Joint Market and Technology Study:

Composites in the Furniture Industry – Final Report

AZL
Aachen GmbH

The Objective:

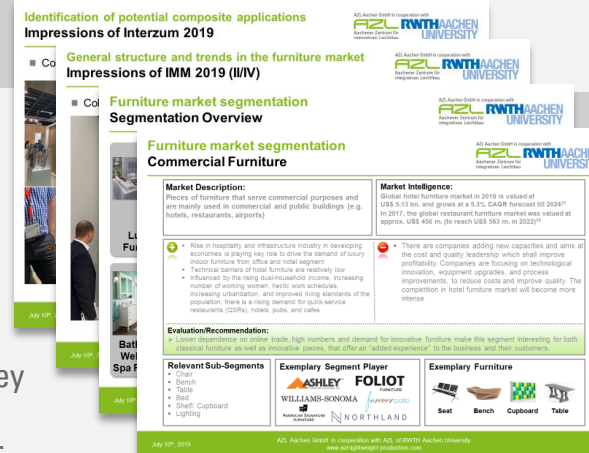

Trends like mobility, urbanization or society shift lead to changes and new demands in the furniture industry. The report of the finished study provides an understanding of the furniture industry. Subsequently it identifies potential applications for fibre reinforced composites in this industry.

Our Content:

- Furniture Market Segmentation and analysis
 - Reveal global market trends
 - Further classification of the furniture pieces
- Technical Requirements of upcoming applications
 - Design, Environment, Mechanical / Structure, Lifecycle
 - Highlight segments and requirements by consortium survey
- Strengths of composites over traditional materials
 - Start-of-the-art solutions compared to possible new solutions on exemplary applications
- Identification of high-potential applications
 - Development of matching matrix
 - Adjustable for individual needs

Your Benefits:

- Comprehensive report (100+ pages) of 9 months study on the furniture industry
- Insights and market facts, numbers, players
- Matching matrix with wide range of applications and requirements
- Well-proven methodology with detailed results and recommendations

Report Costs

6,000.00 €
