

## Next Generation Mobility Solutions

### The Objective:

In terms of solutions for goods and humans, the future mobility will change dramatically. The rising demand as well as the growing market volume are the starting point for a detailed investigation. Therefore, the project aims to evaluate different component concepts based on composites that meet the challenges of future mobility solutions.

### Your Benefits:

- Comprehensive report with over 500 pages
- Identification, analyzation and evaluation of potential
  - 5 major market segments
  - 16 sub-segments
  - 28 sub-sub-segments
- Potential analysis for 29 components
- Business case and process chain analysis of 5 selected applications (incl. models of production scenarios)
- Pre-competitive, detailed insight in trends, markets and potential of mobility solutions

### Our Content:

- Market segmentation and analysis
  - Classification of different segmentations
- Technology trends and requirements
  - Application, material and technology key trends
  - Requirements of today's and upcoming solutions
  - Overview of state-of-the-art
  - Future mobility trends
- Identification of potentials for composite materials
  - Matching composite materials on mobility technologies and trends
  - Evaluation of component concepts

### Report cost (company size)

< 10 employees	5,000.00 €
< 50 employees	7,500.00 €
< 500 employees	10,000.00 €
> 500 employees	12,500.00 €
