

Joint Market & Technology Study

Composites in Aircraft

AZL Aachen GmbH

Excellence in Lightweight Production

Key objectives:

- Analyze the current and future market landscape for aerospace composites across high-growth segments (aviation, UAVs, rotorcraft, aircraft interiors)
- Identify the latest materials, technologies, and manufacturing processes
- Investigate case studies and best practices

What you'll get:

- Actionable insights into the development of the different aerospace market segments
- In-depth understanding of the latest materials, technologies, and processes
- Knowledge of requirements and preferences across aerospace segments
- Awareness of the regulatory environment
- A clear understanding of the supply chain

Open to join

Duration: approx. 6 month
