

Joint Market & Technology Study

# Energy Efficiency and Renovation in Buildings & Infrastructure

**AZL** Aachen GmbH

Excellence in Lightweight Production

## Key objectives:

- General understanding of market, trends and challenges regarding energy efficiency and renovation
- Investigate what applications already exist, where potentials for composites lie using different materials, material forms or material mixtures and what are drivers and barriers for composites

## What you'll get:

- Holistic overview over the market, active companies and suggestions for entering or enlarging the market
- Evaluation of current solutions and ongoing development regarding materials and processing - which solutions could be competitive, based on a neutral AZL evaluation
- Business Case Analyses - Different production scenarios and costs for different material solutions

## Open to join

Duration: approx. 6 month
