

## JOB DESCRIPTION DETAILS

DOMO Chemicals offers polyamide-based engineered materials solutions and services for the automotive, consumer goods, industrial goods, electricals and electronics industries. Based on the company's upstream and downstream integration, DOMO also serves the agricultural, chemical, pharmaceutical, fiber and textile sectors. Its complete portfolio of polymer-based products and services includes chemical intermediates, base polymers, engineering plastics and performance fibers. Some of its best-known brands include TECHNYL® engineered materials, STABAMID® PA66 virgin grades, DOMAMID® PA6 virgin resins, NYLEO® Polyamide 66 fibers and TECHNYL® 4EARTH® sustainable polyamides.

### Position Purpose

Within the Knowledge and Data team, the Materials Science Engineer is responsible for managing the technical aspects of OEM approvals. Provide the analytical data and information necessary to verify process and product compliance, to ensure that products meet original equipment manufacturer quality standards.

### Major/key accountabilities

Under the supervision of the Manager of the Application Center Data & Knowledge Team, the Materials Science Engineer will be in charge to support Commercial organisation in product homologation management at OEM level, the main missions will be:

#### Managing material homologations

- Identify and prioritize together with the strategic and commercial teams, Product management and Application Development Managers the right products for strategic and customer driven product homologations.
- Define the long-term recurring data collection programs for all product and plant homologations.
- Coordinate with the laboratory all necessary internal and external qualification measurements.
- Coordinate the consolidation of all results in technical reports and internal technical databases.
- Support the laboratory in developing suitable internal analytical methods in accordance with customer requirements

#### Manage product listings and norms

- Act as focal point for the complete organization for all issues related to product listings
- Provide a well-structured, regularly updated and easily accessible overview of all product listings for the complete global TECHNYL product portfolio and of all relevant external product norms
- Coordinate the regular update of all external listing platforms and internal databases
- Translate norms into relevant product characteristics and/or specifications and implement them into existing tools and technical documentation
- Interact on a regular base with customer and OEM material experts
- Support the organization in identifying gaps in the existing product portfolio or identify opportunities for new product development to fulfill relevant customer and OEM norms
- Represent DOMO at external material information systems

Ensure compliance with HSE regulation, quality standards and company policies
