

AZL Technology Access Booster Package

# Fire Test Procedure for Battery Pack Protection

Unlock essential Know-How on Design,  
Technologies, Materials Requirements and the  
Market Trends

**AZL** Aachen GmbH

Excellence in Lightweight Production

## YOUR BENEFITS

- **Comprehensive know-how:** Understand the difference in fire protection behaviour of various materials in all facets – as insider or even without prior knowledge.
- **Neutral perspective:** The out-of-the-box view helps company insiders to review or further develop their strategies and uncover new opportunities.
- **Gain strategic action points:** Receive essential insights to make well-founded decisions for the introduction or advancement of fire safety know-how in your company.
- In a **dedicated workshop**, we address individual questions, develop a customized roadmap, and outline defined action steps for boosting your technology access.
- **Individual Testing:** Compare your materials to the numerous already tested materials

## OUR OFFER

- Workshop: An interactive and hands-on workshop with AZL experts
- Report: Comprehensive documentation on 300+ pages
  - Overview on requirements
  - Introduction of different solutions and test methods
  - Real cell test results as reference
  - Description of AZL testing method "Strength Test" and "Particle Blast Test"
  - Test results of 50+ materials
- Your investment: 19.500,00 € excl. VAT
