

AZL Technology Access Booster Package

Multi-Material Battery Casing

Unlock essential Know-How on Design,
Technologies, Materials Requirements and
the Market Trends

Excellence in Lightweight Production

YOUR BENEFITS

- **Comprehensive know-how:** Understand the technology, its applications and market potential in all facets – as insider or even without prior knowledge.
- **Neutral perspective:** The out-of-the-box view helps company insiders to review or further develop their strategies and uncover new opportunities.
- **Gain strategic action points:** Receive essential insights to make well-founded decisions for the introduction or advancement of battery casing know-how in your company.
- In a **dedicated workshop**, we address individual questions, develop a customized roadmap, and outline defined action steps for boosting your technology access.

OUR OFFER

- **Workshop:** An interactive and hands-on workshop with AZL experts
- **Report:** Comprehensive documentation on 500+ pages
 - Market & industry insights
 - Share regulatory, standards & IP landscape info
 - Overview on designs, materials & manufacturing state-of-the-art
 - 20 multi-material design concepts
 - CAE optimizations against relevant load cases
 - Evaluation of cost, weight and volume efficiency
- Your investment: 17.900,00 € excl. VAT
