

AZL Technology Access Booster Package

Propellers & Rotors

Unlock essential Know-How on Design, Technologies, Materials Requirements and the Market Trends

AZL Aachen GmbH

Excellence in Lightweight Production

YOUR BENEFITS

- **Comprehensive know-how:** Understand the technology, its applications and market potential in all facets – as insider or even without prior knowledge.
- **Neutral perspective:** The out-of-the-box view helps company insiders to review or further develop their strategies and uncover new opportunities.
- **Gain strategic action points:** Receive essential insights to make well-founded decisions for the introduction or advancement of lightweight tailgate know-how in your company.
- In a **dedicated workshop**, we address individual questions, develop a customized roadmap, and outline defined action steps for boosting your technology access.

OUR OFFER

- **Workshop:** An interactive and hands-on workshop with AZL experts
- **Report:** Comprehensive documentation 300+ pages
 - Overview of the propeller and rotor market analysing their potentials and challenges
 - Comprehensive understanding of the requirements for propellers and rotors, the characteristics of various materials, and the techniques used in production
 - Evaluation of advanced propeller design and possible future applications
 - Understanding of the complete process chain of the realization of propellers and rotors based on selected highlight components, incl. design and cost evaluation
- **Your investment:** 14.900,00 € excl. VAT
