

## Advanced Plastics & Composite Applications in Defence & Space Systems

A structured market and technology study mapping defence and space applications, materials, manufacturing routes, and functional benefits of plastics and polymer/non-polymer composites

Markets and Applications | Materials | Production Technologies | Business Opportunities

## Participants of the Kick-off Meeting

---

## Did you know those facts about the space industry ?

- **Global Space Industry: Market Size and Forecast**

*The global space economy reached approx. \$546 billion in 2023. [1]*

*The market could grow to \$1.8 trillion by 2035 driven by commercial satellite services, launch innovation and government invest, representing an annual growth rate of around 7% [2]*

- **European Space Industry: ESA Budget and Investments (2021-2027)**

*The EU plans to invest approximately €15 billion through 2027 in key programs like Galileo (navigation), Copernicus (Earth observation), and IRIS<sup>2</sup> (secure satellite communications).[3]*

- **By 2035, the number of satellites in orbit is projected to exceed 50,000**

*with hundreds of new small satellites launched every month. [2]*

- **Market prediction models indicating a CAGR of 12.11%**

*starting at \$1.47 billion in 2023 to \$4.61 billion by 2033 [4]*

- **Investments in space technologies require large budgets and long-term contracts,**

*e.g. MT Aerospace received \$33.5 million from ESA to develop a demonstrator systems made of CFRP for a prototype which will be implemented in the Ariane 6 launch vehicles [5]*

# Advanced Polymer & Composite Applications in Defence & Space Systems

## Did you know those facts about the defence industry ?

### DEFENSE

- **Readiness 2030 / ReArm Europe Plan**

*EU member states plan to mobilize up to €800 billion through the Readiness 2030 plan to strengthen European defence infrastructure [6]*

- **SAFE Program (Security Action for Europe)**

*Emergency loan program worth €150 billion to support the European defence industry via joint defence procurement, called Security Action for Europe (SAFE) [7]*

- **GERMANY and FRANCE**

*The German defence budget has nearly doubled since 2021, now totaling around €70 billion and France plans to increase its defence spending by 30% nominally by 2030 [8]*

- **JAPAN has committed to increase defence spending to 2% of GDP by 2027**

*marking a shift from its longstanding '1% of GDP' rule [9]*

- **In 2022 JAPAN avowed in its new National Defence Strategy and Buildup Plan**

*to redouble effort for preserving a domestic defence production base, but still relying on international projects, e.g. Global Combat Air Programme with UK and ITALY [10]*

There are large and further growing business potentials for polymer-based materials and polymer/non-polymer composites in space and defence industry sectors which will be identified, structured and analysed within this market & technology study

# Advanced Polymer & Composite Applications in Defence & Space Systems

## Project Objectives and Results

---

### Objectives:

- General understanding of market, trends, and challenges
- Knowledge of latest design, materials & state of the art manufacturing
- Evaluation of current solutions and ongoing development regarding design, materials, and processing
- Network with potential partners & customers at events

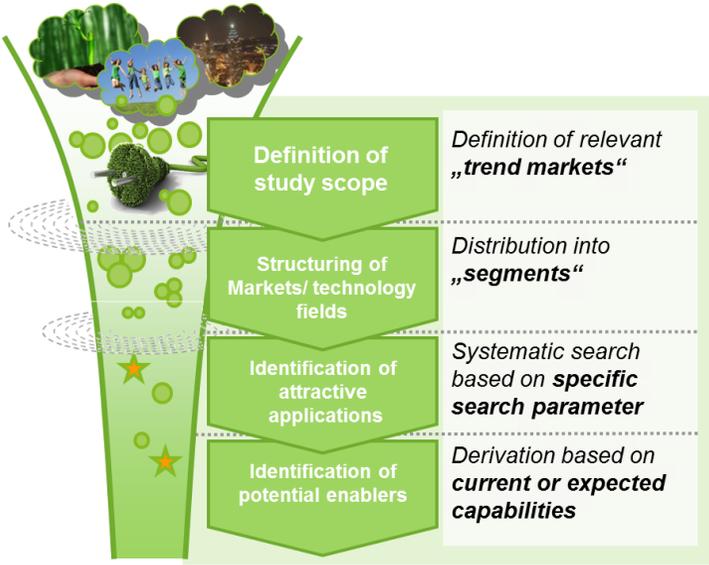

### Results:

- Discover trends in markets & technologies within the addressed industry sectors
- Understand value chains and provide information on market-active companies
- Overview regulatory, standards & IP landscape info
- Estimate potential for different materials, manufacturing and design methods and evaluate performance influence parameters and cost

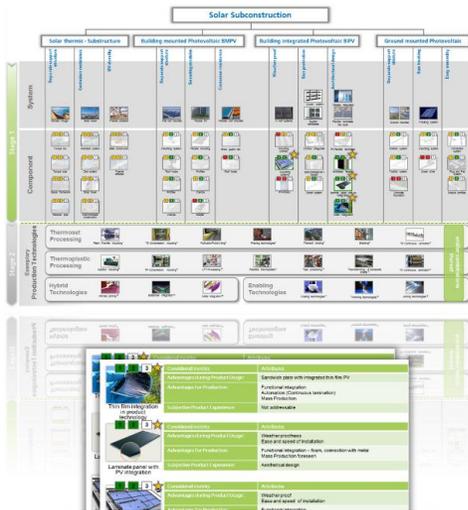

# Advanced Polymer & Composite Applications in Defence & Space Systems

## Systematic Approach of this Market & Technology Study

**Exemplary Approach of a Reference Study: see Annex A**

Structured analysis and evaluation of technologies & applications in technology trees:

### Market Overview & Segmentation

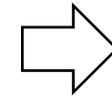

- Space Technology
- Defense

### Application & Technology Insights

- Comparative screening of relevant applications within identified sub-segments

### Technology Insights and Value Chain Mapping

- Technology overviews
- Overview on value chains incl. key players

### Segment Profiles (incl.)

- Segment description
- Market intelligence
- Drivers and hurdles and constraints (e.g. regulatory, functional, operational)
- Potentials for composite related technologies
- Sub-segments

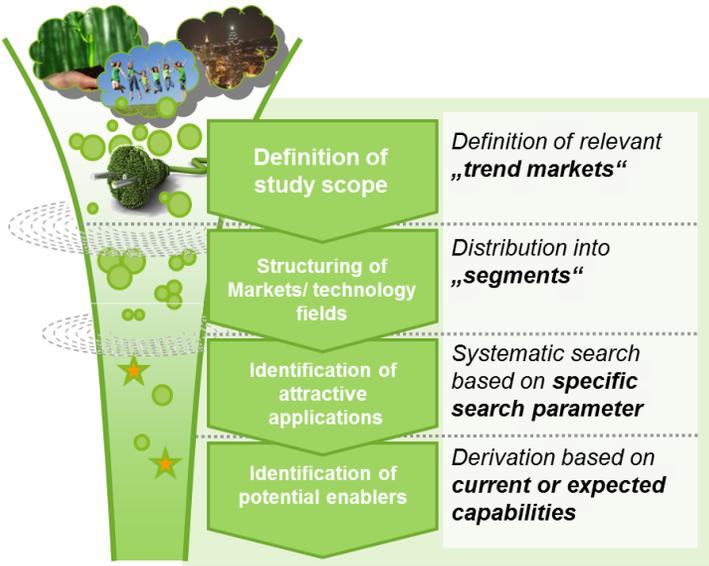

Results will be prepared as:

- Comparative KPI matrices
- Technology trees
- Value maps and fact sheets
- Technology fact sheets and providers

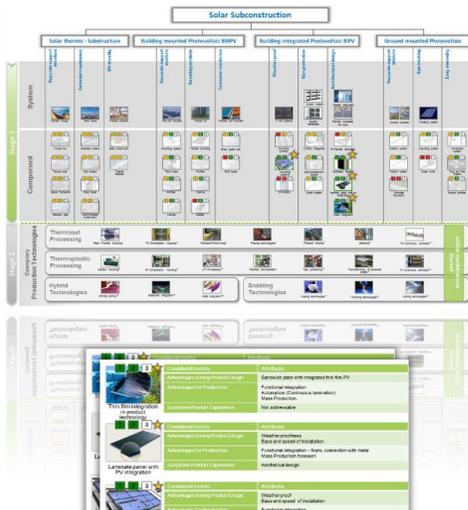

# Advanced Polymer & Composite Applications in Defence & Space Systems

## Systematic Approach of this Market & Technology Study

**Exemplary Approach of a Reference Study: see Annex A**

Structured analysis and evaluation of technologies & applications in technology trees:

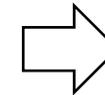

### Market Overview & Segmentation

- Space Technology
- Defense

### Application & Technology Insights

- Comparative screening of relevant applications within identified sub-segments

### Technology Insights and Value Chain Mapping

- Technology overviews
- Overview on value chains incl. key players

Results will be prepared as:

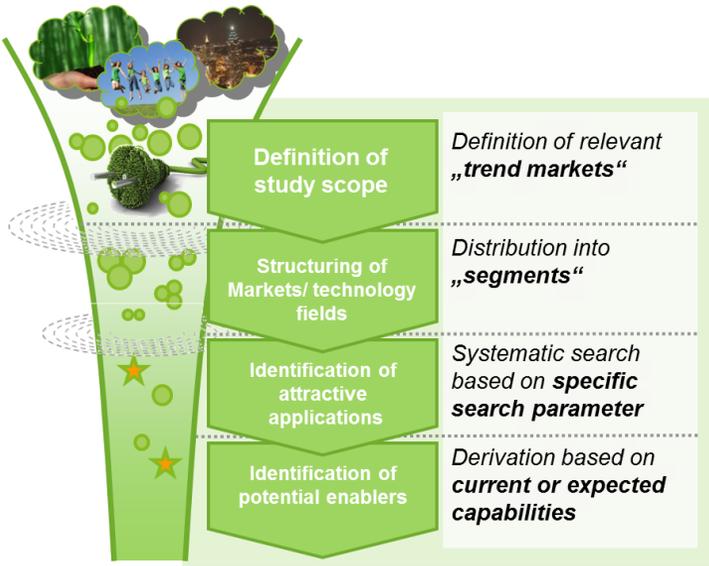

- Comparative KPI matrices
- Technology trees
- Value maps and fact sheets
- Technology fact sheets and providers

- Technology trees
- Comprehensive list of specific challenges
- High-level information for the systems and applications to apply a rating and evaluation scheme
- Selection of applications for more detailed analysis according to the interests of the participating companies
- Detailed studies for selected applications

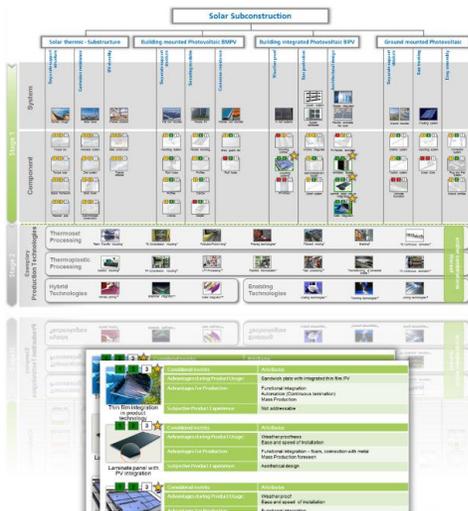

# Advanced Polymer & Composite Applications in Defence & Space Systems

## Systematic Approach of this Market & Technology Study

Exemplary Approach of a Reference Study: see Annex A

Structured analysis and evaluation of technologies & applications in technology trees:

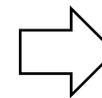

### Market Overview & Segmentation

- Space Technology
- Defense

### Application & Technology Insights

- Comparative screening of relevant applications within identified sub-segments

### Technology Insights and Value Chain Mapping

- Technology overviews
- Overview on value chains incl. key players

Results will be prepared as:

- Comparative KPI matrices
- Technology trees
- Value maps and fact sheets
- Technology fact sheets and providers

- Technology fact-sheets related to materials and production technologies for parts including processing technologies, technologies for functionalizing, joining, post-processing, coating
- Identification of key players across the value chain
- Strategic positioning and business opportunities are visualized.

# High Value Composite Applications – Space & Defense

## Systematic Approach of this Market & Technology Study

Open to join!

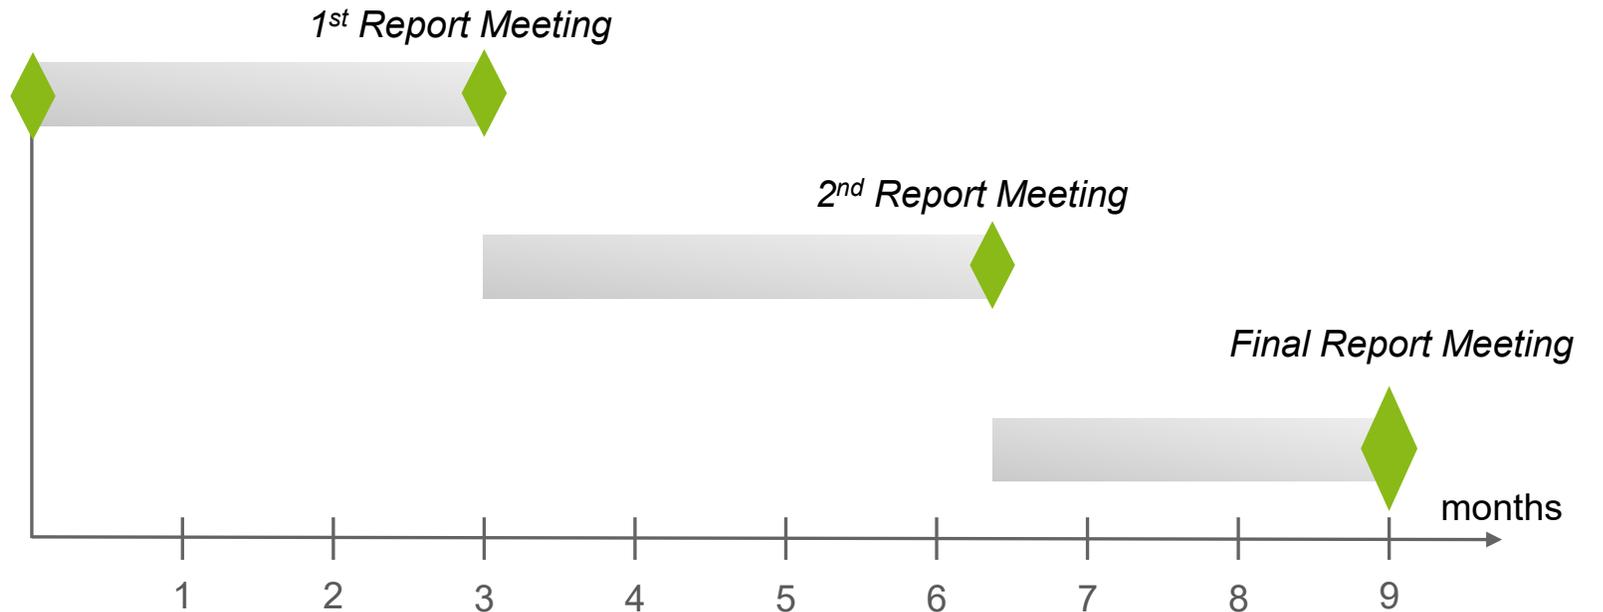

**Onboarding Meeting**  
September 04<sup>th</sup> 2025

**Stage 1:**  
**Market Overview & Segmentation**

**Stage 2:**  
**Application & Technology Insights**  
Comparative screening of relevant applications within identified sub-segments

**Stage 3:**  
**Technology Insights and Value Chain Mapping**  
Detailed studies on technologies and value chains

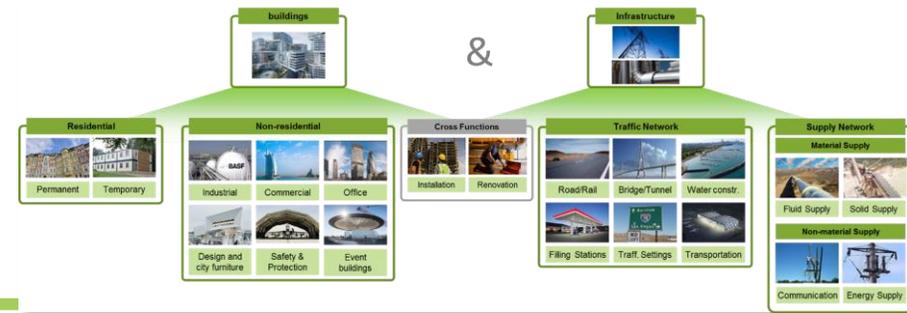

**Exemplary Reference Study:**  
**“Composite Technologies in Buildings & Infrastructure”**

# Market and Business Opportunity Identification

## AZL Market and Technology Studies

Structuring and analysis of trend markets and market segments

Systematic analysis of attractive applications

Identification and benchmarking of technologies and enablers

Analysis of business cases

- Systematic and established approach
- Market analysis through the eyes of technology experts

# Market and Business Opportunity Identification

## Examples of Joint Market and Technology Studies

### Example joint studies:

- Mass Production for Lightweight Composite Structures
- Composites in Buildings and Infrastructure
- Energy Storage Systems
- Composites in the Furniture Industry
- Next Generation Mobility Solutions
- High-Performance SMC
- Potentials and Challenges of Thermoplastic Tapes for SME Injection Molders
- Bio-based Composites

“The AZL study on Buildings and Infrastructure provided us a **great networking with key players** and gave us a **proper market understanding** including market size/volume in numbers to prove the value of this technology to building industry.”

Justin Jin, CEO of AXIA Materials

# Joint Technology Development through Cost-Sharing

## Previous Activities

**Joint Partner Project**  
Trends & Design Factors for Hydrogen Pressure Vessels

**Joint Partner Project**  
Thermal Propagation

**Joint Partner Project**  
Rotor Sleeves for Electric Motors

**Joint Partner Project**  
Emerging Battery Storage Technologies

**Joint Partner Project**  
Propellers and Rotors

**Joint Partner Project**  
Cost and CO2 Saving Lightweight Tailgate Concept Study

**Joint Partner Project**  
Concept Study & Development of Cell-to-Pack Battery Casings

**Joint Partner Project**  
Battery Casing Follow-Up: Bottom Impact Protection

**Joint Partner Project**  
Battery Casing Follow-Up: Fire Protection

**Joint Partner Project**  
Multi-Material Battery Casing

**Joint Partner Project**  
Inductive Double Belt Press

**Joint Partner Project**  
Ultra-Fast Manufacturing

**Joint Market & Technology Study**  
New Potentials for Composite Technologies in Buildings & Infrastructure

**Joint Market & Technology Study**  
Composites in the Furniture Industry

**Joint Market & Technology Study**  
Potentials and Challenges of Thermoplastic Tapes for SME Injection Molders

**Joint Market & Technology Study**  
Next Generation Mobility Solutions

**Joint Market & Technology Study**  
Energy Storage Systems

**Joint Market & Technology Study**  
High-Performance SMC

**Joint Market & Technology Study**  
Bio-based Composites

Exemplary Reference Study  
„Buildings & Infrastructure“

Get more details on completed activities!

# Exemplary Approach of a Reference Study „Composite Technologies in Buildings & Infrastructure“

## Structuring of Applications based on Market and Product Segments:

### AZL – Market and Technology Study

#### „Lightweight Composite Structures for Buildings & Infrastructure“: Application Examples

AZL Aachen GmbH in cooperation with:  
AZL Aachen Zentrum für integrativen Leichtbau RWTH AACHEN UNIVERSITY

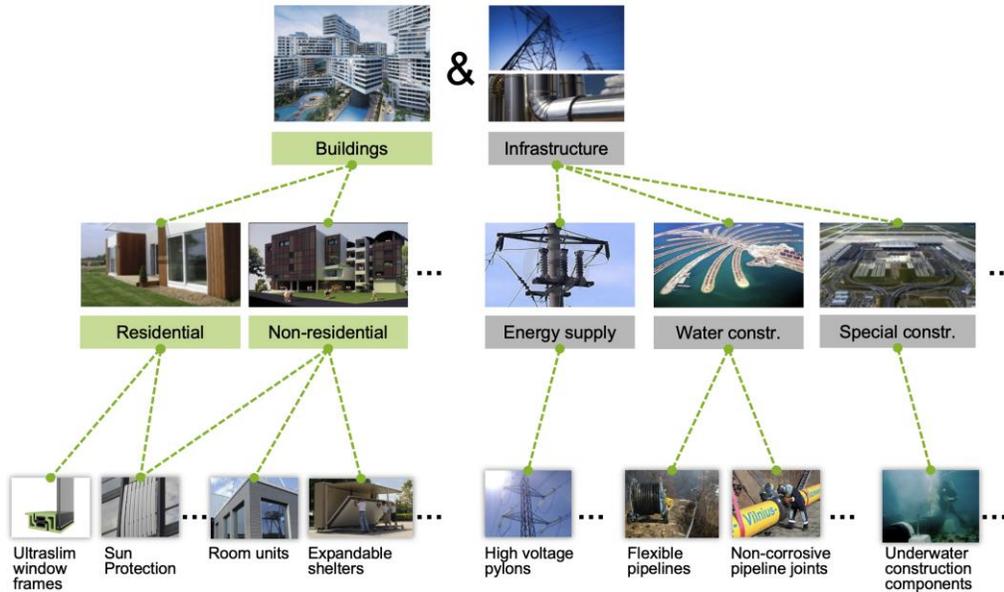

#### Markets

#### Market Segments (Examples)

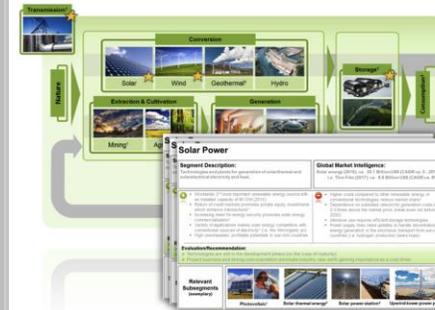

#### Applications/Components (Examples)

### Exemplary Proceeding Stage 1 – Pilot Study

AZL Aachen GmbH in cooperation with:  
AZL Aachen Zentrum für integrativen Leichtbau RWTH AACHEN UNIVERSITY

#### Market Segmentation

- Structured overview on market segments within „Buildings & Infrastructure“, market structure and overall market volume

#### Segment Analysis

- Overview on high level chances, risks
- Technology and market trends

#### Segment Evaluation

- High level aggregation of market and technology intelligence
- Selection of most promising segments based on expert knowledge (interviews) and appraisal of the steering committee

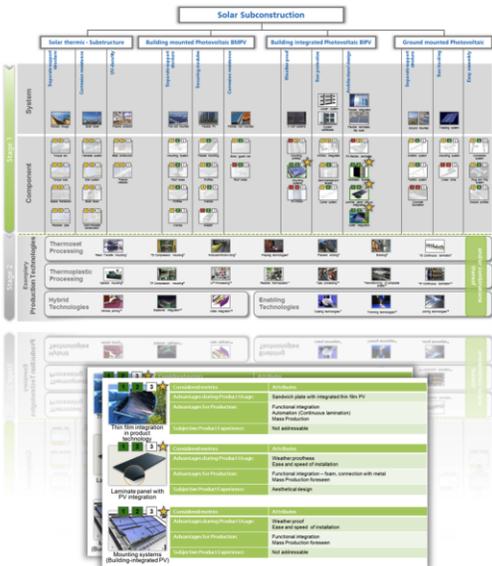

# Exemplary Approach of a Reference Study „Composite Technologies in Buildings & Infrastructure“

## Technology Trees

(including sub-segments with value chain overview, technology overview and market analyses):

### Exemplary Proceeding Stage 1 – Pilot Study

#### Segment Sub-structure

- Overview on technology fields within the market segment at hand

#### Detailed Segment Analysis

- Derivation of major challenges within these sub-segments in order to enable a focussed selection of growing or developing marketsegments

#### »Technology Tree«

- Market requirement-based breakdown of relevant sub-segments into systems and components
- Criteria-based (market and technology) prioritization of applications/ components

### Exemplary Proceeding Stage 2 – Detailed Analysis

#### Value-Chain Overview

- Connected and/or synergetic technologies within the value-chain of the component at hand
- Visualization and quantification of added value steps and derivation of future requirements regarding material, process chains and production systems

#### Detailed Technology and Market Analyses

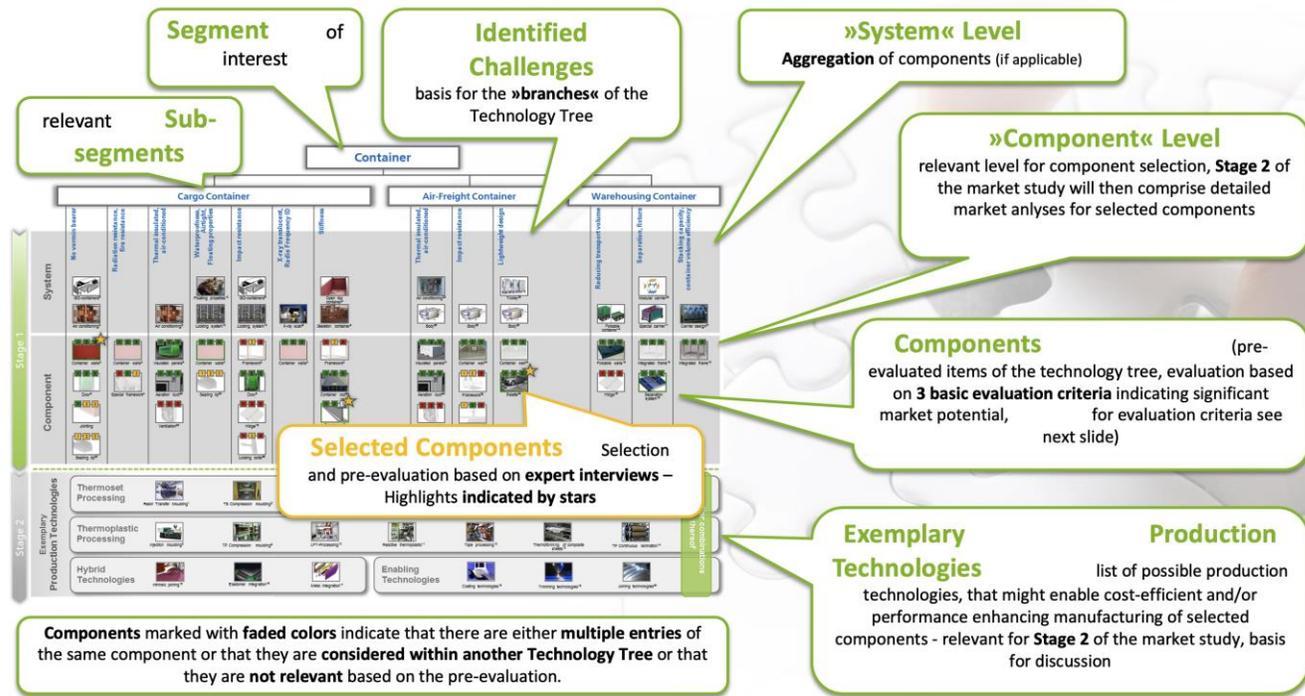

- Detailed Aggregation of relevant technology- and market-related information
- Executive Summary for quick evaluation
- Information basis for selection of highlight components/ applications

# Exemplary Approach of a Reference Study „Composite Technologies in Buildings & Infrastructure“

## Technology Tree:

### How to read the »Technology Tree« Overall Structure

in cooperation with:  
**AZL** Aachen GmbH  
AZL Aachen Zentrum für  
Integrierten Leichtbau  
**RWTH AACHEN**  
UNIVERSITY

Potentials regarding:  
(lightweight design, material properties)

Advantages during Product Usage  
Advantages for Production  
Subjective »Product-Experience«

1

### Advantages during Product Usage

- Mechanical** (e.g. increased load capacity, light weight performance, lower temperature warpage)
- Chemical** (e.g. better corrosion properties, increased chemical resistance, biological compatibility)
- Electrical** (e.g. tailored electrical properties)
- Optical** (e.g. tailored optical structure and design surface)

2

### Advantages for Production

- Freedom of Design** (e.g. load adapted design)
- Manufacturability** (e.g. estimated improved design/performance by local reinforcements)
- Process** (e.g. shorter cycle times, increased process robustness, automation possibility, possible mass-production)
- Costs** (e.g. estimated performance gain over substitutional material/ design going along with higher margin etc.)

3

### Subjective Product-Experience

- Subjective value** (e.g. willingness to pay more for the knowledge of utilizing lightweight components or innovative materials, prestige thinking)
- Performance optics** (e.g. customer is willing to pay more for lightweight design like optics without real performance gain)
- Perceived quality** (e.g. customer is willing to pay more for lightweight design like haptics, customer trust in high-performance etc.)

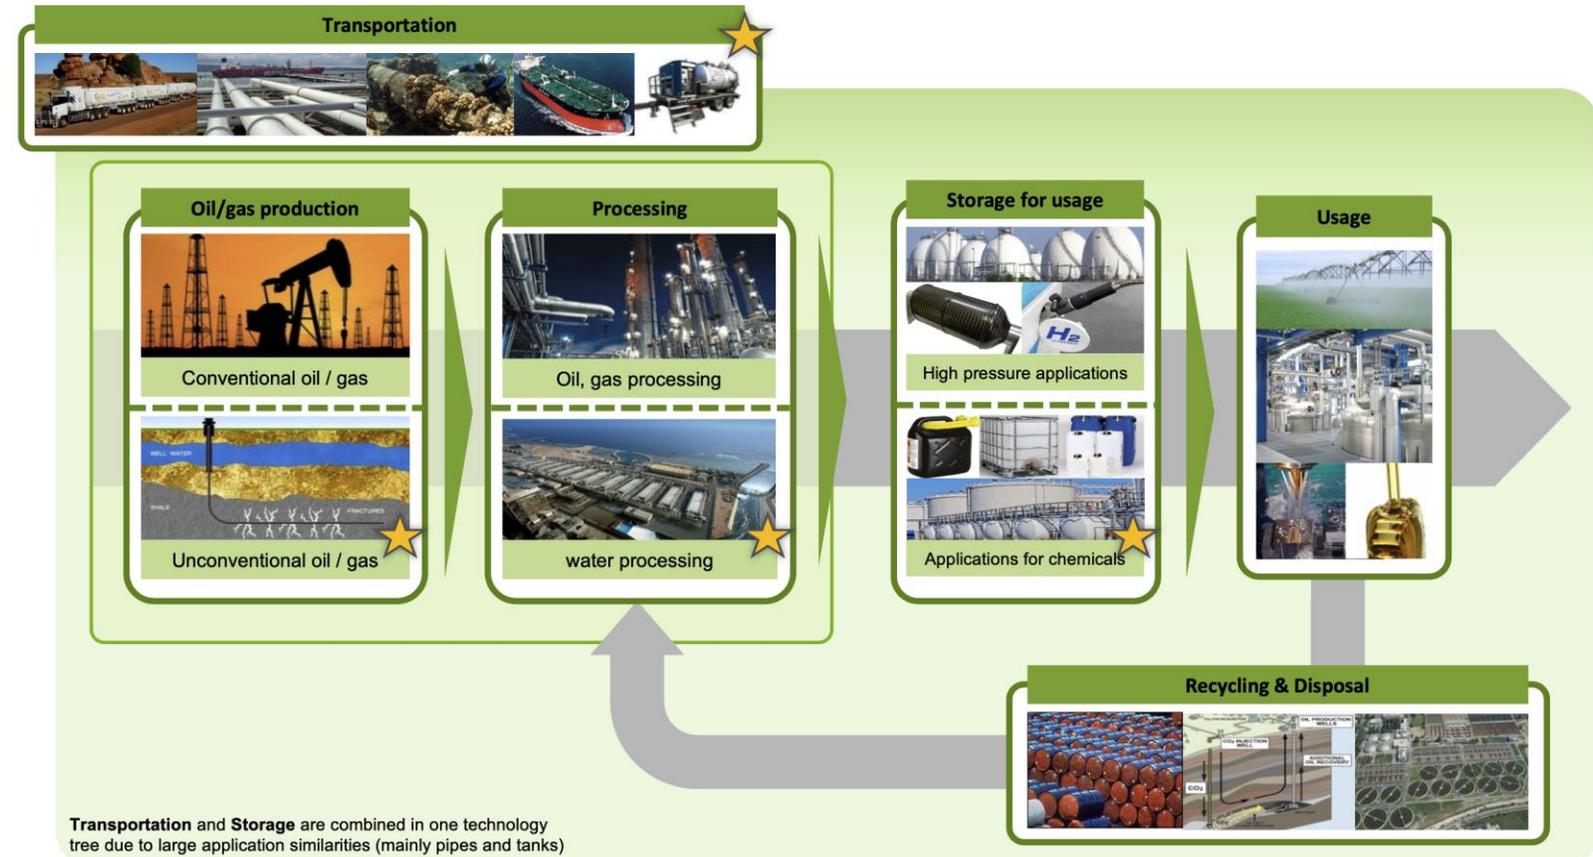

Elements not relevant for Evaluation (e.g. no subjective product value imaginable) will be left plain white
